

# secure Enterprise Video Platform

## Streamline Your Video Communication

We offer a simple, secure way to successfully manage all your company's video use cases. The secure Enterprise Video Platform (sEVP) is the best of its kind today and boasts fast uploads, high-quality streams, and exceptional security standards. The modular, secure, and user-oriented technology powers a wide selection of advanced features, such as rights management and tailor-made video portals.

### Social Intranet

Allow your employees to connect and communicate securely via video.

### Investor Relations

Use the power of video to illustrate your corporation's success to investors.

### Town Hall Meetings

Enable video access to corporate events, live or on-demand.

### Corporate Learning

Distribute eLearning videos across your enterprise.

### Recruiting and Onboarding

Extend the reach of HR through onboarding and/or training videos.

### Product and PR Footage

Increase user engagement by sharing videos of your products and services.

### Corporate Tube

Create your own branded corporate YouTube-like video platform.

### Help Desk and Support

Reduce service desk traffic and lower operational costs with support videos.
