

# Easy-to-use Plugins

Video collaboration in Microsoft's ecosystem

Our secure Enterprise Video Platform (sEVP) offers three Microsoft plugins: SharePoint, PowerPoint, and Outlook. Each of these plugins can enhance different Microsoft applications with video capabilities. Together, they can transform any business into an end-to-end digital workplace.

**Add links or videos to the secure EVP directly from within Outlook.**

- > Screen capture
- > Webcam capture
- > Combined (screen + webcam) capture
- > Multiple audio recording selection
- > Video ingest
- > Video list
- > Video sharing

**Seamlessly integrate, manage, share, and stream video within SharePoint sites, Wikis, and discussion threads.**

- > Multiple supported versions (SP2010 onwards)
- > Embedding videos from SharePoint's interface
- > Account / Channel / Video selection
- > Search
- > Editable metadata
- > Preview player
- > Video editing options including video player, frame, placement, and more
- > Video ingest
- > Token protection
- > Single Sign On

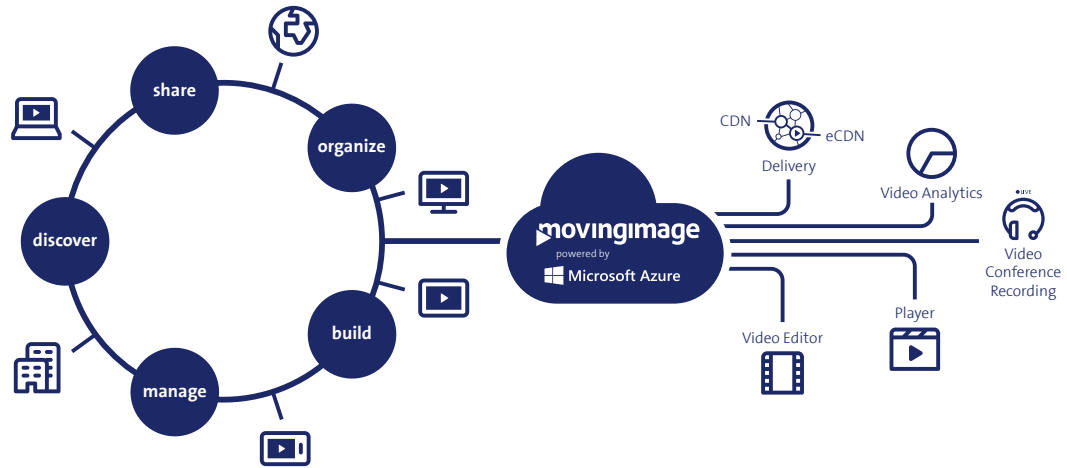

**Stream videos directly from PowerPoint presentations.**

- > Video selection
- > Embedded player
- > Direct streaming from the video manager
- > Adjustable size
- > Search
- > Channel selection

Our sEVP ecosystem allows you to consolidate all your video assets in one secure platform.

Our plugins correlate with three of the most popular Microsoft applications and are designed to enhance their video delivery capabilities. No more switching between applications. No more redundant processes. No more hassle. Try them today and enjoy a new standard of video communication both within the enterprise and on the internet.
