

CorporateTube

Share, store and stream videos

CorporateTube is a video sharing portal that enables enterprises to securely create, share, and stream video content on any device or web browser. Use it to reduce uploading time, enhance conversion rates and security, and ultimately realize the potential of your corporate video assets.

CEO Communication & Town Hall Meeting Recordings

Enable video access to recorded corporate events.

Corporate Learning & Onboarding

Provide company-wide access to eLearning and onboarding videos for all employees.

Social Intranet

Allow your employees to connect and communicate securely via video.

Enterprise Highlights:

Main Features

- > HTML5-based portal with custom design
- > Any modern device & web browser
- > Metadata & statistics
- > eCDN and CDN delivery
- > Interactive collaboration features: upload, rating, comments

User Authentication

- > Granular rights & roles
- > Single-Sign-On via SAML2.0

Security

- > GDPR compliant
- > ISO 27001 certified data centers and redundant storage on German & European servers
- > Extensive security options (SSL encryption, geo-blocking, token authentication)

Workflow

Create high quality videos and easily share them with other employees. CorporateTube boasts secure enterprise video workflows powered by the most advanced backend engine on the market.
