# Virtual Conferencing

One place everyone can meet

The need to be remote worker-friendly, environmentally responsible and cost-conscious, combined with the emergence of a younger, highly mobile generation entering the workforce, is driving a collaboration technology revolution.

Virtual meeting spaces have proven themselves as people-centric vehicles for effective collaboration. Our video conferencing room is a virtual meeting room with a flexible design and extraordinary interoperability where teams can collaborate with anyone in high-quality, no matter where they are or what device they use.

UC Client

Enable People

A personal cloud room lets users host, share content and collaborate with up to 30 participants. All delivered in leading edge quality.

Join from Anywhere

The meeting assistant app lets you join meetings the way you prefer, connect a video room, from a pc or even from the phone itself.

Encrypted & Secure

Cyber criminals are unpredictable. We deploy robust security and encryption policies for complete peace of mind.

swisscom

How it works

Anyone can join

We support Microsoft collaboration tools, Google Hangouts, Cisco Webex, Bluejeans and all major web browsers.

Start On-Time

Simple one click meeting planning via an outlook plug in (everyone gets an option to join) with one button to push to join and start on-time stress-free.

Control Meetings

The meeting management interface ensures full control of your meeting. Manage access & audio, stream live and record.

Replicate Workflows

Customisable to meet organisational deployment needs. Manage and optimize, workflows, settings, access and branding.

Scalable & flexible

Our cloud room supports the changing needs and capacity requirement of modern organisations with no fuss.

Interoperability

Meeting participants can join using any of the following:

Key Features

Planning- & Joining

- > Unique video adress per room with custom domain
- > Outlook plug-in for easy scheduling
- > Multiple joining options: Video, WebRTC, Kinly App, Voice
- > One-click to join meetings from all rooms

Meeting

- > Up to 30 participants in one multi-party meeting
- > Control user interface for host - web and app based
- > Adjustable meeting lay-outs & bi-directional content sharing
- > Optional: Customer branding, streaming and recording

Quality and Management

- > Runs on a global Quality-of-Service (QoS) network
- > Managed and operated by dedicated operation & support center
