

Extended WLAN

The plug & play solution for a professional WLAN network at small and medium-sized events.

With Extended WLAN from Swisscom, you get a user-friendly and professional solution for the WLAN network at your event. This product optimally complements your existing internet connection to reach even more guests.

Extended WLAN is ideal for events where your router's WLAN function reaches the limits of its capacity – whether due to the number of visitors or the area to be covered. This solution is characterised by the option of bundling different internet lines to create a comprehensive network. Benefit from an offer that meets the highest demands and can be optimally tailored to your needs.

Your advantages with Extended WLAN

- High-quality WLAN network
- Integration of various internet solutions
- Easily scalable to the number of visitors and the desired area
- Can be used both indoors and outdoors
- All required components* in one box
- Simple commissioning thanks to prior configuration by a Swisscom expert
- Ready for immediate use thanks to plug & play
- Installation by your IT specialist, or if required by a Swisscom partner or our specialist

*LAN cable not included in the package, optionally available from us

The customizable solution for your event.
Get even more for a perfect network.

Do you have any other needs? We would be pleased to inform you about Swisscom's numerous additional options. Get the most out of your event network for a small extra charge. Whether you want to integrate your printers into your network via LAN or WLAN or operate the same network across several locations, we will always find a solution that meets your requirements.

from **CHF 1'276.-** exkl. VAT
